Recently graduate Practical Software Engineering, I am highly motivated and eager to develop, great team player, fast learner and self learner.

looking to get my first job as a FullStack/FrontEnd developer .

Projects

Health routine -MEAN Stack Graduation Project

I developed and designed a website for tracking user medicine, by adding medical details (alert of send by mail), user as well can buy natural product (simulation), pharmacy address search, and signUp/In.

GitHub - <https://github.com/EstPe/My-health-routine>

library - Angular and JSON Server

I developed and designed a website using Angular and Bootstrap with DB JSON. A shop for books, user can signUp/signIn. user can add to cart, buy books and see their description.
